SUMMARY

Applied AI Engineer

focused on building and deploying production-ready LLM systems. Experienced in developing **RAG pipelines**, API-driven AI services, and automated workflows using **FastAPI**, Docker, and open-source models. Strong in translating business needs into scalable AI solutions, with hands-on experience in fullstack development and system design.

Fullstack AI Engineer Intern March 2025 – Aug. 2025 *M-Glitz* Palembang, Indonesia

- Developed and designed web application for an in-house inventory and information management system using React and Express.js.
- Engineered RESTful APIs to process stock transactions, ensuring secure and consistent data flow across internal company dashboards.
- Structured relational database schemas (ERDs) and mapped system workflows to digitize and automate manual inventory tracking.

IT Solution Intern July 2024 – Dec. 2024 *BPJS Ketenagakerjaan* Palembang, Indonesia

- Developed an automated WhatsApp messaging system using Python and Selenium to handle late payment notifications, eliminating manual outreach workflows.
- Collaborated with division stakeholders to build data tracking pipelines, logging chat interactions and delivery statuses to monitor collection efforts.

Head of Research and Technology Feb. 2024 – Feb. 2025 *BEM KM Fasilkom Unsri* Palembang, Indonesia

- Directed a 10-person engineering team, managing project timelines and overseeing the end-to-end delivery of organizational software solutions.
- Engineered an internal management web application using PHP and MySQL, designing relational database schemas to centralize activity tracking and role assignments.
- Developed "Techporia," a public-facing event registration platform using CodeIgniter, integrating secure payment gateways to process user transactions.

EDUCATION

Universitas Sriwijaya GPA: 3.96 Bachelor of Computer Engineering *Aug. 2022 – March 2026*

IELTS Score: 8.0/9.0

PROJECTS

AI Financial Tracker & Receipt Scanner
Ingrevia: Recipe Recommendation
RAG Notebook

TECHNICAL SKILLS

Python, SQL, JavaScript, TypeScript, PHP TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy FastAPI, React, Express.js, Docker, GCP, Git
